How To Set a Formal Table

MANTELandTABLE.com

welcome

I'm so glad you're here! Thank you for subscribing to Mantel and Table, and congratulations for taking the first step to creating beautiful formal tables!

You're going to be so happy with how easy it is, and also how much it elevates your tablescape!

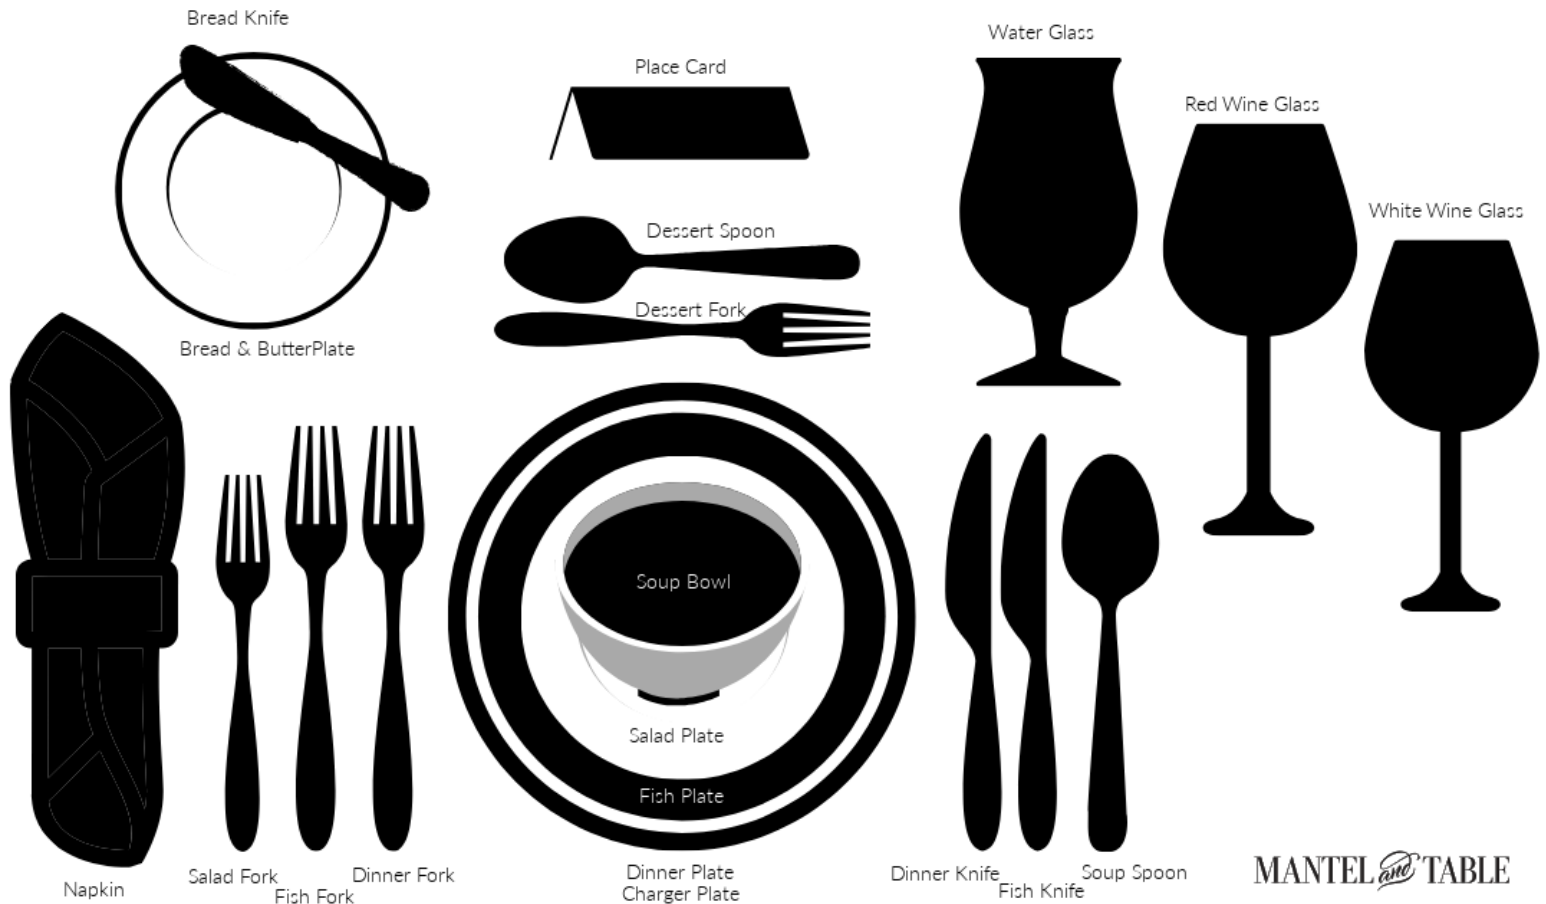

Some of my favorite times in life have happened at the dinner table. There's something about having a meal in a pretty setting, talking, laughing, and sharing, that creates a welcoming place where everyone wants to be!

I've been a corporate event planner for 30+ years, and I love arranging private gatherings of all types and sizes! I've had lots of time and motivation to learn about formal table settings, and I can't wait to share them with you.

Formal Table Setting

Here's the Basic Formal Table Setting

This is probably the most common way to set your formal table. Of course there are other pieces that can also go on a formal table, but these are ones people use the most.

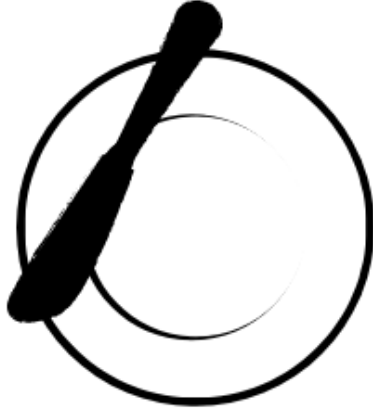

The main thing to remember is to only use the pieces you need to use for the menu you've created. If you're not having a fish course, for instance, leave off the fish plate, knife, and fork. Just scoot the other fork and spoon in to fill the space.
